

# Welcome to More Renewable Electric Service, Fairfield!

The City of Fairfield is partnering with MCE, a local not-for-profit public agency that provides a choice of more renewable electricity options at stable and competitive rates. Service will start automatically in April 2022.

## How does MCE affect electricity services for Fairfield residents and businesses?

With input from residents and businesses, the City of Fairfield voted to join MCE to offer cleaner electricity options. Starting with your April 2022 billing cycle, MCE will become the primary provider for your electricity generation. MCE's standard service option offers a minimum of 60% renewable energy — nearly twice as much as PG&E's 31%. You can choose to stay with MCE's default standard service, upgrade to MCE's 100% renewable energy, or choose PG&E's generation service.

**MCE's generation service will replace PG&E's generation service on your bill.** PG&E will continue to deliver your electricity, maintain power lines, provide repairs, and send your monthly bill.

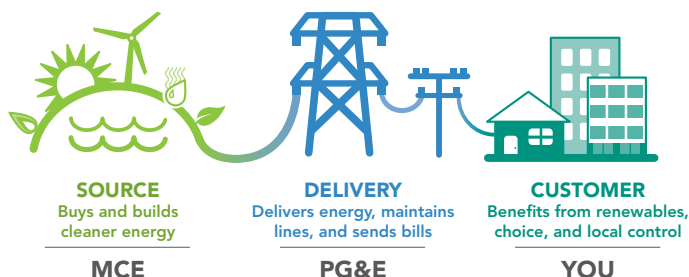

## What is MCE?

MCE is a not-for-profit public agency, directed by its 37 member communities — not private shareholders. MCE launched service in 2010 to provide a choice in electricity providers, buy electricity for customers with a higher renewable energy content, and re-invest ratepayer dollars locally. MCE is not funded by taxpayers. Over the past 11 years, MCE has reinvested more than \$180M from its electricity services back into its member communities.

Councilmember Doriss Panduro represents Fairfield on MCE's Board of Directors.

Services Provided	MCE	PG&E
Twice the state's average renewable energy content	✓	
Competitive and more stable rates	✓	
Locally controlled rates, services, and programs	✓	
Solar net energy metering (NEM)	✓	✓
100% renewable service options	✓	✓
Automated payment plan services	✓	✓
Energy efficiency rebates and programs for residential, commercial, industrial, and agricultural customers	✓	✓
CARE/FERA	✓	✓
Medical Baseline	✓	✓
Budget Billing	✓*	✓
SmartRate		✓

\*For MCE customers, Budget Billing is applied to PG&E gas and electric delivery charges. MCE electric generation charges are not included in the Budget Billing calculation and are billed separately. As a result, your total charges will vary from month to month.

### How do MCE's rates compare to PG&E's?

For current rates and cost comparisons, visit [mceCleanEnergy.org/Fairfield](https://mceCleanEnergy.org/Fairfield). For over a decade, MCE has provided stable and competitive rates compared to PG&E. We typically only change our rates once a year or not at all. Customers who are enrolled in discount programs such as CARE, FERA, and Medical Baseline automatically receive the same discount with MCE; no action is needed.

### Will my billing service change?

No. PG&E will continue to send one monthly bill. Instead of one fee that combines charges for the delivery and generation of your electricity, the bill will show separate charges — one for PG&E's electric **delivery** and one for MCE's electric generation.

**MCE's generation rates replace the generation charges you currently pay to PG&E; they are not an additional charge.**

Electric delivery provided by PG&E		Electric generation provided by MCE

### Will I need to have anything installed in order to receive MCE service?

No, MCE will not need to install anything nor will we make any changes to your PG&E meter. MCE will simply meet your energy needs from more renewable sources. MCE's generation services will replace PG&E's generation services.
